E-mail:

**Preparation of an abstract for the annual meeting of the Danish Hypertension Society
Abstracts for the Annual Meeting, 17 – 18 April, 2020**

A.B. Other, C.D. Another

Department of Anything, University of Anywhere, 1234 Anywhere, Anycountry.

Indent first paragraph and any subsequent paragraphs with three spaces. Do not include any blank lines, do not give subheadings in the text.

The abstract should be informative, containing (a) the study's specific objective, unless this is given by the title; (b) brief statements of methods, if pertinent; (c) a summary of the results; (d) the conclusions. It is not satisfactory to state "the results will be discussed". Avoid superfluous words.

If references are included they should be placed in brackets within the text using the following format: Jensen AB et al. Arch Hypertens 1900; 12: 34-56. Do not underline, italicize or embolden any word. Use generic names for drugs. New drugs must be identified adequately.
